This is a generated placeholder standing in for the real interview transcript. The real export ships one PDF per record in the pdfs/ folder, named <id>.pdf.

Summary: The expert, a former head of supply chain, walks through customer churn drivers and retention levers at Kestrel Aerospace Parts and gives a view on realistic scenarios for the next 12 to 18 months.

Q: How would you characterize the last two quarters? A: The expert describes a gradual normalization after an unusually strong prior year, with pricing holding better than volumes. Q: What should investors watch? A: Renewal outcomes in the largest accounts and any change in the discounting posture of the two main rivals.
